## SBS Cobra

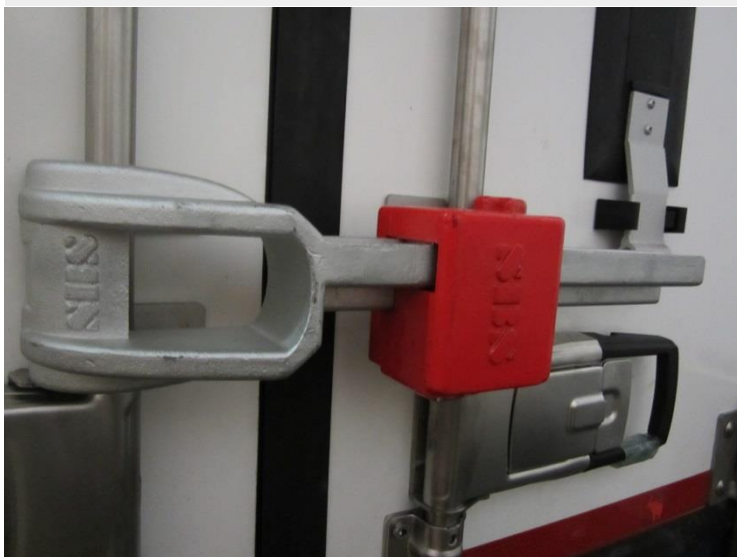

### Description

The SBS Cobra is a heavy duty container lock that clamps the locking bars together. When placed correctly, the SBS Cobra covers the mounting brackets of the locking bars, preventing thieves from simply removing them to gain access.

The SBS Cobra is easy to use and comes in handy on trips where a trailer is exchanged between several drivers: each driver locks the Cobra with his own padlock.

The SBS Cobra fits all containers and trailers with locking bars.

The Cobra locks with an Abloy PL358 or SBS PL7000 padlock and is SCM/VbV approved.
