SBS BDL-H

Description

The SBS BDL-H is a special version of our known BDL. The BDL-H is especially suited for installation on cooler/freezer trailers but also fits dry boxed trailers.

Originally designed for trailers with flat surfaced revolving doors and handles underneath the door, the BDL-H locks the doors onto each other, preventing theft and attacks.

The BDL-H locks with an Abloy PL358 or SBS PL7000 padlock. These high-end padlocks have anti-drilling protection and cannot be lock-picked.

Technical information

- Material: steel
- Finishing: red powdercoating
- Abloy PL358 or SBS PL7000 padlock

Optios

- Equal conclusive or master key system
